# Driving Improvement & Efficiency

## Bridging the Way to Excellence & Resilience

To optimize its performance an organization must first understand its processes and thereafter create sustained continuous improvements

As the world of business evolves, the positioning of organizations irrespective of size or sector to appropriately manage growth within well-defined parameters that minimize cost and optimize revenue has never been more important. Actually, the volatility of markets and economies across the globe is increasingly demanding higher levels of refine management and agile leadership, without which, the prospects of survival into the long term can be significantly compromised.

Organizations positioning themselves to better understand and appreciate that financial outcomes are the end result of the management of a myriad of process and performance measures, outperform others and improve their prospects to efficiently manage change and grow, even in volatile situations.

# Your Lean Management Level 1 Green Belt Course Overview

## Your Lean Green Belt Certification includes

1

*Excelligence*

- **Introduction to Lean:** The history and five principles of Lean, defining value, the eight wastes, "Flow" and Value Streams and Kaizen rapid improvement.
- **Introduction to Six Sigma:** The history of Six Sigma, the DMAIC approach, process variation and  $Y = f(x)$ , DPMO, the "Hidden Factory" and the Critical to (CT) Tree.
- **Writing Effective Problem Statements:** The 5W2H method for writing effective problem statements, use the "Five Why" and defining improvement goals.
- **Introduction to Kaizen:** Introduction to Kaizen rapid improvement and how to plan an execute successful Kaizen events.
- **Using the A3 Report for Rapid Improvement:** How to use the A3 Report for rapid improvement projects.

## Your Lean Green Belt Certification includes

2

*Excelligence*

- **SIPOC Mapping:** Construct SIPOC diagrams to provide a high-level view of a process, incorporating key information about suppliers, process inputs, the process itself, and the key outputs required by customers.
- **Understanding and Implementing 5S/6S:** Establishing 5S/6S workplace environments.
- **Implementing and Facilitating Lean "Huddles":** Learn how to implement and facilitate daily Lean "Huddles".
- **Visual Workplace:** Learn how to leverage visual workplace principles, methods and techniques to enable a work environment to become self-ordering, self-explaining, self-regulating and self-improving..
- **Standard Work:** Understand the principles and methods behind standard work including key components that make up standard work, including takt time and task sequencing.

## Your Lean Green Belt Certification includes

3

*Excelligence*

- **Mapping the Process** : Learn how to map a process using process flow mapping tools and techniques..
- **Spaghetti Diagrams**: Learn how to construct spaghetti diagrams to identify opportunities for improvement in work cell/workplace design and layout.
- **Gemba (Waste) Walks**: Learn how to plan and conduct "Gemba Walks" to better understand the customer experience, identify improvement opportunity and engage the front line team.
- **Failure Modes and Effects Analysis (FMEA)**: Identify and assess process risk using the FMEA and leveraging this analysis for continuous improvement.
- **Error-Proofing/Mistake-proofing**: Learn how to apply error-proofing, (Poka Yoke), to improve processes and reduce risk.

## Your Lean Green Belt Certification includes

4

*Excelligence*

- **Controlling the Process:** Introduction to statistical process control (SPC) and using "voice of the process" and control plans to manage and improve your processes.
- **Assessing Process Capability:** Capturing and assessing the voice of the customer. Understanding process tolerance versus specifications. Determining process capability.
- **Constructing Project Charters:** Establishing "winning conditions" for your projects using project charters.
- **Managing Change:** Understand how to assess resistance and conduct change readiness assessments and stakeholder analysis to better manage change.
- **Brainstorming, Affinity Diagrams & Team Voting:** Learn how to facilitate effective brainstorming sessions, group by affinity, and use voting techniques to help prioritize and achieve consensus.

## Your Lean Green Belt Certification includes

5

*Excelligence*

- **Cause & Effect Diagrams & the Five Whys:** Construct cause and effect diagrams. Aka "Ishikawa", "Fishbone". Use of the "Five Whys".
- **Pareto Charts and the 80/20 Rule:** Constructing Pareto charts to focus on the "vital few".
- **Value Stream Mapping:** Learn how to construct value stream maps - an essential Lean tool.
- **Kanban and Material Management:** Eliminating waste and constraints to process flow with improved material management techniques including Kan Ban and point of use systems. JIT, Touch once, batch reduction and single piece flow.
- **Work Levelling/Load Balancing:** Construct a load levelling chart and apply techniques to balance work and reduce bottlenecks.

## Your Lean Green Belt Certification includes

- **Work Cell Design & Improved Office/Facility Layout:** Improve work cell layout and design to improve flow.
- **Rapid Changeover Techniques/SMED:** Learn techniques for establishing and facilitating Rapid/Quick changeover.
- **Process Control Plans and Control Charts:** Statistical process control (SPC) and implementing process control plans and selecting and constructing control charts and run charts to capture the voice of the process.
